Front-end job application- assessment

A: HTML Templates (mandatory)

This assignment concerns a social intranet for our client CuraNu. Make html templates from the supplied designs. The design will be delivered on desktop format. The Templates will also have to be viewable on the tablet and the mobile phone.

The contact form must be validated, the form may not be sent before all fields have been filled in correctly. The data does not have to be sent to somewhere.

You may use the following technologies: HTML, CSS (SASS) and Javascript. When setting up the HTML you do not have to use frameworks like Bootstrap or Foundation.

B: Accordion (mandatory)

In the design an accordion is placed at the top left of the homepage. You can use jQuery, underscore or other libraries, as long as the functionality of accordion works 100% customization.

Conditions:
1. Clicking on the head of a closed block causes the block to open and
the text below will become visible. Folding the block open must animate.
2. Clicking on the head of an open block closes the block. Closing the block
Must also animate.
3. Make sure that when you click on the head of a closed block, that you have to change (earlier)
the open blocks that are closed. This must be an option that can be turned on or off
when creating the object.
4. Make an option that ensures that the first block is open when initiating. This must
an option that can be turned on or off when creating the object.

The following steps are optional. You can carry out these assignments the showcase what you are able to do. In these assignments there is no priority, carry out the assignments in any order you prefer. It is permitted to scrutinize the assignment at its own discretion, if this does not detract from the scope of the assignment.

C: Use a framework (optional)

These templates will ultimately be used in a headless installation. The dates in the templates coming from web services through JSON and the routing becomes cared for in the frontend.

Make sure the templates use a javascript framework like AngularJS, ReactJS, Vue.js, etc. The strategic back-end does not have to be, data may be placed by means of mockup JSON.

D: surprise us (optional)

Surprise us (optional), Build something that we have not thought of or that you think is a valuable addition. Bear your choices during the presentation
